VR BIKE

Have Fun + Get in Shape + Challenge your friends = BikeVR

The Gameplay

Bike VR is an endless runner game, where the player aims to collect pickups on the road ahead of him, avoid obstacles, and escape the nearing doom rushing behind him,

to survive the longest possible time the player must keep pedaling slowly at first but rapidly speeding up and stay focused to avoid obstacles and choose optimal paths up ahead.

The Bike Kit and Sensors

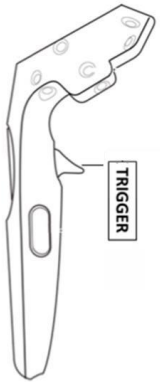
The bike Kit **contains** the following modular elements:

- Vike GroundMount
- Vike BodySensorKit
- Vike Controller attachment

The Bike Kit and Sensors

The Bike Kit allows our application detect all of the bikers moovment and simulate a precise virtual ride:

- 6-DOF Headsets and pressure sensor on the seat allow for a precise prediction of the riders center of mass through body position predictions.



- VR controllers are equipped with back triggers that mimic bike brakes and can be used to better maneuver the environment.

The Business Model Canvas

Key Partners

Who are our Key Partners?
Who are our key suppliers?
Which Key Resources are we acuariring from partners?

Motivations for partnerships
Optimization and economy
Reduction of risk and uncertainty
Acquisition of particular resources and activities

- Gyms
- Amusement parks
- VR headset manufacturers
- 3D printing manufacturers

Key Activities

What Key Activities do our Value Propositions require?
Our Distribution Channels?
Customer Relationships?
Revenue streams?

- Development of the game software
- Development of the bicycle embedded kit
- Continuous reporting for a better business intelligence profiling
- Maintenance, update and new features additions to the game
- Delivery and customer service
- Keeping in touch with the community

Key Resources

What Key Resources do our Value Propositions require?
Our Distribution Channels? Customer Relationships?
Revenue Streams?

- Contracts with key partners
- Gaming Community
- Fitness Community
- Developers and Technicians

Value Propositions

- Creating a space where you can mix biking (sports) with an immersive and challenging experience

Customer Relationships

What type of relationship does each of our Customer Segments expect us to establish and maintain with them?
Which ones have we established?
How are they integrated with the rest of our business model?
How costly are they?

- Customer service

Channels

- The Game
- Sports and equipment stores
- Games stores
- Gyms
- Amusement parks
- Company website
- Advertisement

Customer Segments

For whom are we creating value?
Who are our most important customers?

- Private individuals
- Amusement park owners
- Gym owners
- Event organisers

Cost Structure

What are the most important costs inherent in our business model?
Which Key Resources are most expensive?
Which Key Activities are most expensive?

- Materials for building the kit and bicycles
- Salaries
- Advertisements

Revenue Streams

For what value are our customers really willing to pay?
For what do they currently pay?
How are they currently paying?
How would they prefer to pay?
How much does each Revenue Stream contribute to overall revenues?

- Selling the game
- Renting the game
- Selling the bicycle kit
- Renting the bicycle kit
