EDUCATION

Engineering Master's Degree National Institute of Applied Science and Technology

2016- 2022 Tunis,Tunisia

Major: Software Engineering
Minor: DevOps

SKILLS

- **Software :** Unity .NET Blender
- **Programming Languages:** C# C++ HLSL SQL TypeScript
- **Technologies:** XR BLE Mesh Git CI/CD Web API

LANGUAGES

- **Arabic** : Native Language
- **English** : Bilingual Proficiency
- **French** : Bilingual Proficiency

EXTRA-CURRICULAR

- **Head of AudioVisual** Tunisian National Robotics Day
- Active Member and **Head of AudioVisual** CinéRadio INSAT
- **INTERFERENCE** Voluntary Installed Hans Kotter's suspended electrical artwork, featured on L'instantM
- **INTERPOL** Capacity Building & Training Speaker (2025)

ACADEMIC PROJECTS

Indoor camera position prediction AI to manage BIM building in AR

- Detecting humanly traversable paths in a generated 3D building Model with a 81% accuracy.
- Capturing an image database from a runtime generated 3D model.

PROFESSIONAL EXPERIENCE

Project Manager - Multiplatform Educational solution

Creating a multi-application solution with a custom API and dashboard

August 2024 - Present Millennium Technologies - Abu Dhabi, UAE

- Selecting the right people for the right position to build an efficient specialized team.
- Guiding 30+ developers and asset creators ensuring project success.
- Designing the architecture for a multi-platform solution.
- Helping define project scope and timeline.

Technical Lead - Custom XR Hardware Project

Installed Africa's second Immersive Room and XR hub

March 2023 - March 2024 Park Of Economic Activities - Zarzis,Tunisia

- Revising the technical requirements for an international tender dossier.
- Technically guiding the Commercial team for the XR center.
- Developing a VR navigation solution with Unity to promote the center's activities.

VR and Embedded Developer

Creating a VR multiplayer shooter that adapts gameplay to player stress

February 2022 - August 2022 ICONIK SA - Marseille,France

- Developing the enemies AI behaviour for attacking players and movements.
- Optimized architecture with suitable design patterns for clarity and reliability.
- Improving the git workflow.
- Integrating a blood pressure detection bracelet with the gameplay.

.NET Developer

Designing and developing for a .NET web application

January 2021 - January 2022 Rooly - Tunis,Tunisia

- Putting in place a roadmap for product development.
- Developing a .NET WebAPI server to handle multiple user interactions.
- Decoding automotive CAN bus communication to extract useful data.

3D Mobile Developer AR/VR

Developing an interactive digital twin for BIM buildings' managment

May 2020 - March 2021 DATA PM - Tunis,Tunisia

- Runtime 3D mesh generation in UNITY from a WebAPI using Zenject.
- Developing customizable shaders in HLSL increasing performance by 8%.
- Asynchronizing 3D mesh generation reducing load time by 70%.
- Developing the application's UI on Unity.

VR Simulation Developer

Developing and prototyping a virtual reality immersive bike fitness game

May 2019 - March 2020 Blackdune Studio - Tunis,Tunisia

- Creating a procedural automatic level generation system.
- Emulating bicycle physics in UNITY.
- Implementing a virtual reality environment.
- Prototyping an embedded system to detect wheel speed and riders lean.
